ADDRESS CORRECTION REQUESTED **RUSH — TIME DATED**

TODAY & TOMORROW

FEBRUARY 2-15, 1985

He was there to see the Dolphins drown. . . Richard Morrish of the UCSF Animal Care Facility was the lucky winner of a Super Bowl raffle sponsored by the UCSF Child Care/Study Center. Some $3,600 was raised by the Center from ticket sales. Morrish attended the game with his son.

Have you ever considered excavating the ruins of Solomon's Harbor or following the migration of wildebeest across the Serengeti Plain of Africa?

The University Research Expeditions Program (UREP), invites you to share in the adventure and rewards of scientific discovery as an active member of a UC research team.

You don't have to be a scientist to join an expedition; curiosity and willingness to share the costs and challenges of field work are the main qualifications. The contribution can range from $500 to $1600 depending on the project and covers research expenses and food.

UCSF researchers who will be conducting UREP field expeditions this year are:

- Guy Pawson, epidemiology: "Impact of Modernization on a Sherpa Community," Everest National Park, Nepal, April 14-30 and May 5-21;
- Lydia Temoshok and Jane Zich, psychiatry, LPPI, "AIDS in London: The British Response," May 1-14, May 18-31, June 2-15 and June 17-30.

For a free catalog describing all expeditions planned for the 1985 field season, contact University Research Expeditions Program (UREP), University of California, Desk K5, Berkeley, CA 94720 or call 642-6586.

The 1984/85 Resource Guide to Geriatrics and Gerontology now is available. This free, 36-page resource guide is prepared by the UCSF Regional Area Health Education Center and includes course descriptions, research abstracts and other aging-related activities offered at UCSF's four professional schools.

Copies of the guide can be obtained at the AHEC office at 1356 Third Avenue or by calling x1526.

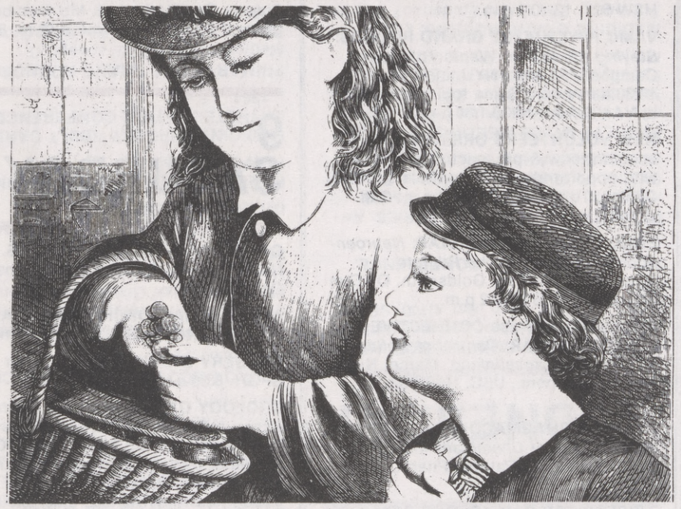
DEADLINE

Deadline for the next issue of *Today & Tomorrow,* covering the time period Feb. 16-Mar. 1, will be **Tuesday, Feb. 5, 11 a.m.** Please send your copy to Allen Balderson, News & Public Information Services, 532 Parnassus Ave., Rm. 300, x1541 or x2557.



For the first time, this year's Founders Day will include an Awards Luncheon at which several honors, usually given throughout the year, will be given to campus and community individuals for their contributions. The luncheon will be held at noon on Thursday, April 4, in the Millberry Union lounges, during which the Chancellor's Award for Public Service, the Chancellor's Award for Exceptional University Service and the Distinguished Nurse Award will be presented.

That evening the UCSF Medal Dinner will be held in conjunction with the Founders Day Banquet.

Nominations now are being sought for the Chancellor's Award for Public Service and the UCSF Medal.

- UCSF students, staff and faculty who have performed outstanding public service to the campus and/or community are eligible for the Chancellor's Award for Public Service. Three awards are made each year, two of which are designated as the Thomas N. Burbridge and Edison Uno Public Service Awards.

Candidates for the Burbridge Award should demonstrate particular contributions to equal education and employment opportunity and to social justice, and should reflect the impact made by Burbridge on all minority and disadvantaged communities.

Candidates for the Uno Awards should reflect Uno's personal involvement in public service activities to bring about social change. All candidates should demonstrate outstanding public service beyond the scope of their normal job duties.

The awards are for $1,000 each, with the UCSF Black Caucus giving an additional $100 to the Burbridge Award.

All nominations must be received in the Chancellor's Office, Room S 126, by Friday, Feb. 8.

- The UCSF Medal, the most prestigious award the campus gives, is awarded to individuals from the community who have made extraordinary contributions to UCSF and the larger community. Nominations should include a brief resume of the individual's attributes and contributions and should be sent to the Chancellor's Office by Friday, Feb. 22.

For further information on both awards call x2401.

UC-Berkeley Regents Lecturer Robert A. Aldrich, MD, of the University of Washington, will lecture on "The Child in the City—The Impact of Urbanization on Children," on Tuesday, February 26, at noon in HSW 301.

Former director of the National Institute of Child Health and Human Development from 1963 to 1964, and former chair of the Department of Pediatrics at the University of Washington, Seattle, Aldrich is a pediatrician and urban planner who has traveled the world seeking to relate children's health to the design and growth of cities. He is responsible for developing last year "KidsPlace—A Kid's Lobby for a Vital Seattle," which may be America's first-ever "kids first" city policy. It includes a five-year agenda to improve Seattle as a place for families and children.

Aldrich's lecture at UCSF is sponsored by the Department of Pediatrics.

The First Rosalind Russell Medical Center for Arthritis Visiting Professor will be Stephen M. Krane, MD, professor of medicine at Harvard.

Krane will be on campus and at affiliated hospitals from Tuesday to Thursday, February 12 to 14, and will discuss:

- Feb. 12: "Heritable Diseases of Connective Tissue." Carr Auditorium, SFGH. 11:30 a.m.
- Feb. 13: "Paget's Disease of Bone." (Second topic of Medicine Grand Rounds.) Cole Hall. 10:30 a.m. to noon. "Cellular Interactions in Matrix Synthesis and Degradation in Inflammatory Joint Disease." HSW 300. 4 to 5 p.m.
- Feb. 14: "Effects of Vitamin D Metabolites on Lymphocytes." VAMC, Building 200, Room A-173. 11 a.m. to noon.

Chief of the Arthritis Unit at Massachusetts General Hospital, Krane was elected president of the American Society for Bone and Mineral Research and to fellowship in the American Academy of Arts and Sciences in 1983. He has been a professor at Harvard Medical School since 1972 and a physician at Massachusetts General Hospital since 1969.

NEWS BRIEFS

Health professionals across the country soon will be using a Self Care Teaching Package for arthritis patients that was developed by the UCSF Rosalind Russell Medical Research Center for Arthritis. The kit will be marketed and distributed by the National Arthritis Foundation.

The package will help health professionals teach osteoarthritis and rheumatoid arthritis patients how to manage their chronic diseases, said Sandra Lewis, program coordinator for the education unit that designed the materials.

She explained that nothing like the kit exists currently and that it was developed to promote quality control in teaching patients. The kit consists of a 21-page flip chart which covers such topics as expected physical changes, exercise, rest, joint protection and the value of heat and cold applications. It also consists of a 42-page teaching guide and a pamphlet-sized version of the flip chart that patients can take home.

Materials were developed by physical therapist Carol Simpson, occupational therapist Cynthia Robbins and nurse Glenda Dickinson.

Clinics and health professionals can order the kit by mailing $35 to Mary Stevens, National Arthritis Foundation, 1314 Spring St., NW, Atlanta, GA 30309.

Emotional and social problems of the physically disabled will be the subject of the fourth Mind and Medicine symposium, sponsored by the Department of Psychiatry.

The program "Body and Mind: Emotional Problems in Physical Disabilities," will be held Saturday and Sunday, February 16 and 17, at the Holiday Inn Golden Gateway.

Speakers for the program are nationally-recognized experts in a variety of fields including psychiatry, surgery, pediatrics, human sexuality, rehabilitation medicine and ethics. They include Albert J. Solnit, MD, Sterling Professor of Pediatrics and Psychiatry at Yale; Gloria D. Eng, MD, director of physical medicine and rehabilitation at the Children's Hospital National Medical Center in Washington, DC; Albert R. Jonsen, PhD, UCSF professor of ethics in medicine; and Edward V. Roberts, PhD, executive director of the World Institute on Disability and vice chair of Disabled Peoples' International.

In addition to lectures on the emotional and social problems associated with physical disabilities, the speakers will discuss bioethics, legal issues, the development of independent living skills and sexuality.

UCSF epidemiologists have developed a rapid, accurate and cost-effective computer method of obtaining California state mortality information, which is crucial in conducting studies of disease and causes of death.

The California Automated Mortality Linkage System (CAMLIS), a project of the Department of Epidemiology and International Health, allows medical and health researchers to match data from their study populations with state death records. A researcher studying possible occupational-related disease, for example, now can take a list of a firm's employees over a given period and easily learn who has died, the date, cause of death and other information on death certificates that could aid follow-up investigation. UCSF is the first institution in the state to computerize this death search function.

A study, published in the December 1984 *American Journal of Public Health,* evaluated CAMLIS against four traditional death clearance procedures and found it accurate, speedy and effective for large-scale epidemiologic studies.

Co-authors of the study were Gerald R. Peterson, PhD, of the Hanford Environmental Health Foundation, Richland, Washington; Diana B. Petitti, MD, MPH, UCSF clinical professor of family and community medicine and member of the Kaiser Permanente Medical Group, Oakland; and Roger E. Smith, California Department of Health Services.

Women volunteers are needed to test whether a new hormonal birth control capsule implanted under the skin can protect them from pregnancy for up to five years.

Preliminary results from 195 patients enrolled in the study for one year in the UCSF Family Planning Clinic at SFGH showed that the capsule approach is even more effective than birth control pills in preventing pregnancy. It has prevented 99 percent of women from becoming pregnant, whereas the pill has protected 98 percent of women, according to the SFGH researchers.

The study is specifically aimed at finding whether a two-capsule implant, which has passed three years of tests, works as well as a six-capsule implant, which is already known to be successful at preventing pregnancy.

Sexually active women between the ages of 18 and 40 who have had at least one live birth and have no complicating medical condition are needed for the study. Participants must agree to return for regular follow-up care. For further information call the Family Planning Clinic at 648-7400.

D. Walter Cohen, DDS, the first UCSF Presidential Scholar, will talk at the School of Dentistry Dean's Seminar on Thursday, February 21, from 12:30 to 2 p.m. in the Postgraduate Dental Auditorium, Room C 701. He will discuss "The French Connection in American Dental Education."

Cohen delivered the UCSF Presidential Lecture, entitled "Changing Concepts in the Etiology of Periodontal Disease," on January 29.

Cohen is an internationally respected scholar on periodontal disease. He is a diplomate of the American Board of Periodontology and former chair of the American Board of Periodontics. He served as dean of the School of Dentistry at the University of Pennsylvania from 1972 to 1983.

Cohen will be at UCSF in the Department of Stomatology through March to conduct periodontal research and present several lectures.

The Northern California Occupational Health Center is sponsoring two courses in February and March:

• "Recognition of Occupational Health Hazards," ASUC Building, Tan Oak Room, Telegraph Avenue and Bancroft Way, UC-Berkeley, Feb. 25-Mar. 1. This course is an introduction to the field of industrial hygiene. It is geared to people who are responsible for identifying problems and evaluating their industrial environment and will deal with the fundamentals of industrial hygiene and surveying techniques. The course is cosponsored by UC at Berkeley, Davis and San Francisco.

• "Indoor Air Quality: Practical Approaches to a Healthy Work Environment," Sir Francis Drake Hotel, SF, Mar. 20-21. The course will provide practical approaches for recognition, evaluation and control of indoor air quality problems in non-residential buildings and will explore scientific, engineering, legal, health and building design issues. It is designed for building managers, owners, builders, employers, employees and occupational health and safety professionals. The course is cosponsored by the Indoor Air Quality Program of the State Department of Health Services and the SF American Lung Association.

To register for either course call 642-5507.

The Friends of Langley Porter Psychiatric Institute have donated a Yamaha piano to the LPPI Children's Service. The $1900 piano will be used for music therapy and several group activities, including sing-alongs and special holiday performances.

APPOINTMENTS

Virgina Olesen: Appointed chair of the Chancellor's Advisory Committee for the Status of Women. The committee examines issues concerning the status of women on campus (excluding those involving wages, hours or working conditions), analyzes existing policies, serves as a coordinating body for concerned groups or individuals and recommends changes to the Chancellor that will continue to afford women equal and fair access to campus programs and activities. Olesen has been professor of sociology in the Department of Social and Behavioral Sciences, School of Nursing since 1973 and co-director of the Women, Health and Healing Program in the department since 1983.

Peter Ng: Appointed associate coordinator, learning resources, UCSF Library. As associate coordinator, Ng will help with the planning of the new library while continuing his duties as director of Educational Media Resources. Ng has been EMR director since he came to UCSF in 1977 from Cornell.

Susan Steffen: Appointed divisional director, maternal/child health nursing, Hospitals & Clinics. Steffen has been coordinator of information systems for nursing since 1981 and has implemented the Biweekly Management Reporting System and the Automated Staffing Scheduling System. She also has been assistant clinical professor, mental health & community nursing, since 1982.

PUBLICATIONS

Alan J . Davidson, clinical professor, radiology: Author, *Radiology of the Kidney* (W.B. Saunders Co., Phila., 1985).

Ronald D. Miller, professor & chair, anesthesia; professor, pharmacology: Co-author, *Basics of Anesthesia* (Churchill Livingstone, NY, 1984).

Peggy Boyd, research associate, epidemiology & international health: Author, *The Silent Wound, A Startling Report on Sexuality & Breast Cancer* (Addison Wesley, MA, 1985).

IN MEMORIAM

Carlotta H. Fleming, widow of former UCSF Chancellor Willard C. Fleming. Fleming was a supporter of UCSF for more than 50 years and played an active role in student-faculty relations, fund-raising and patient service activities. She won the UCSF Medal—the University's highest honor—in 1981. Family services were held on January 27. Contributions may be made to the School of Dentistry's Willard Fleming Scholarship Fund, School of Dentistry Dean's Office, Room S 630, UCSF 94143.

Virginia T. Gardner, an employee for 32 years in student services. She retired in 1983. Gardner came to UCSF in 1951 as an administrative assistant in the Dean of Students' Office. In 1967 she became a foreign student adviser and a coordinator of special services for students. A memorial service was held for her on January 30. Donations in her memory may be sent to the Marin Humane Society or the Marin County Heart Association.

E. Henry Cabaud, assistant clinical professor, orthopaedic surgery since 1981. He also was head of orthopaedic research at Letterman Army Institute of Research. He recently received national recognition for his work on repair and replacement of knee ligaments. He was a member of the Herodicus Society, an international group of orthopaedic surgeons.

Several weighing balances have been stolen from a number of campus laboratories. The balances are relatively small, and easy to conceal and transport, according to UCSF police chief Raymond A. Clark. The stolen balances have been discarded, sold to pawn shops or recovered in illegal drug manufacturing labs, said Clark.

The UCSF Police Department suggests the following steps to prevent further thefts of weighing balances:

• unless permanently secured, keep balance in locked cabinet or drawer when not in use;

• always lock the laboratory, office or storage room door;

• engrave the balance frame with an engraver or hot-point stylus (call x5683 for information);

• call campus police at x1414 to notify them of any strangers in your work area.
